

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

BALTIMORE, MD.

1920.

US
DOCUMENTS
172

KEY

The name of the testator is in **Bold Type**; those persons bearing relationship to the testator, if stated in the will, are in bold type also. All others are in Roman Type. The county of testator follows the name in the same line if it is given in the will itself, and if none appears in the abstract the inference must be drawn that it is lacking in the will.

The dates of drawing and of the probate of each are placed one above the other, opposite the name of testator; that of probate under that of drawing. If either date does not appear in the Calendar a line of dashes is placed in the respective place to indicate the fact that it is lacking in the will as recorded, and if, as is the case in a few instances, neither date or drawing nor that of probate appears in the will, a double line of dashes is substituted.

The numbers at the foot of each abstract give the number of the book and the page from which it has been taken. The book numbers and not the old liber numbers are used, this being in accordance with the system usual with genealogists in making notes from these books.

It will be seen that in many instances overseers or trustees are named by testators. The custom now being obsolete it is best explained by a quotation from one of the wills where a testator, after designating several friends for the office, adds: "who shall assist the executrix in the care of the estate that neither she nor the children be wronged."

Nunc. placed after a name indicates that the will was a nuncupative one.

Young. is used in the calendar as the abbreviation of youngest.

Test., the abbreviation of testis and testes, has been adopted in accordance with the custom of the times rather than the more modern term of witnesses. The other abbreviations and terms are so simple that explanation of them seems needless, since they do not differ from those in ordinary use.

MAR 7 1921

MARYLAND CALENDAR OF WILLS

Burneyat (Burnyeat), John, Talbot Co.,

26th April, 1726;
3rd Aug., 1726.
